About Tenrony

TENRONY
ELECTRICAL

Company Profile

Zhejiang Tenrony Electric Co., Ltd. is a modern electrical enterprise integrating R&D, design, manufacturing, sales and service.

Professional Experience

With over 20 years of professional production experience, we focus on providing high-quality electrical equipment solutions for global customers.

Business Scope

Covers high/low voltage switchgear, prefabricated substations, oil-immersed/dry-type power transformers, distribution transformers and intelligent high-frequency DC panels.

Corporate Vision

Committed to becoming a leading global supplier of electrical equipment, driving sustainable development of global energy.

Strategic Location & Efficient Logistics

TENRONY
ELECTRICAL

Geographical Advantage

Located in Zhejiang, the manufacturing heart of China, we benefit from a mature industrial chain and rich experience, laying a solid foundation for stable production.

Convenient Transportation

Adjacent to Ningbo and Shanghai Ports, we connect quickly to global trade networks, ensuring strong logistics support for international orders.

Efficient Delivery

Our standardized logistics system ensures safe and on-time delivery for both standard and customized orders, fully aligning with your project schedules.

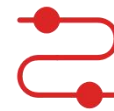

Modern Manufacturing Base

TENRONY
ELECTRICAL

Factory Scale

The company's factory covers a total area of 50,356 square meters, featuring spacious and bright modern production workshops.

Production Layout

The workshops are rationally laid out with clear functional zones, covering the entire process from raw material processing to finished product assembly.

Environment Management

A clean and tidy production environment is the foundation for ensuring product quality. We strictly follow 5S management standards.

Advanced Equipment for Superior Quality

TENRONY
ELECTRICAL

Production Equipment

We have imported a series of internationally advanced production equipment, including CNC machines, laser cutting machines, precision CNC machine tools, automatic transformer production lines, robotic welding equipment, GIS production lines, and CNC busbar production lines.

Inspection Equipment

The company has established two enterprise testing stations equipped with complete and precise professional calibration and testing equipment certified by international authorities, including helium leak detectors. All inspectors hold professional qualification certificates.

Strong Production Capacity & Stable Supply

TENRONY
ELECTRICAL

Revenue scale

The annual sales revenue exceeds 500 million RMB, demonstrating strong market competitiveness and profitability.

Orders Ability

Not only can it efficiently complete regular orders, but it also has the ability to undertake large-scale, high specification customized orders

Supply Chain management

A comprehensive supply chain system ensures stable supply of raw materials and can also guarantee demand during market fluctuations.

Product Center: Transformer Series

TENRONY
ELECTRICAL

We offer a full range of transformer products to meet the needs of different application scenarios.

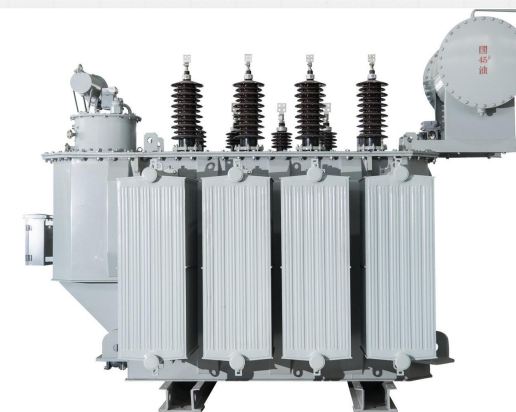

Oil-Immersed Transformer

Features low loss, high efficiency, and good fire resistance. Suitable for various power transmission and distribution systems.

Dry-Type Transformer

Uses advanced insulating materials and processes. Features safety, flame retardancy, moisture resistance, and easy maintenance. Suitable for high-rise buildings, commercial centers, subways, etc.

Distribution Transformer

Specifically designed for distribution systems with stable performance and high reliability.

Product Center: Switchgear & Substations

TENRONY
ELECTRICAL

High-Voltage Switchgear

Adopting advanced technology, it features high reliability and safety. Suitable for various HV power transmission systems, ensuring stability and safety during power transmission.

Low-Voltage Switchgear

Compact design, easy operation, and complete protection functions. An indispensable part of distribution systems, providing reliable power distribution for LV scenarios.

Prefabricated Substations

Integrating transformers and switchgear, it is complete, compact, and easy to install. Widely used in urban grid renovation, industrial parks, and large infrastructure.

Intelligent E-house

Designed for power systems, it provides stable DC operating power to ensure the normal operation of relay protection, automation, and circuit breakers.

Innovation-Driven & Customized Service

R&D capability

We have an experienced R&D team, which keeps up with the development trend of international electrical technology, and constantly carries out technical innovation and product upgrading to ensure the progressiveness of technology.

customer collaboration

The R&D team communicates and collaborates directly with overseas clients, gaining a deep understanding of their specific business scenarios and pain points, and jointly exploring and providing tailored technical solutions.

Localized adaptation

Strictly follow local electrical regulations and standards, fully consider the characteristics of local infrastructure and the actual operating habits of users, and ensure product safety, compliance, and ease of use.

01

Requirements communication

Conduct in-depth research and accurately grasp Customer requirements and application scenarios

02

Solution Design

Provide professional and cost-effective services
Technical solutions and product design

03

Product Development

Agile development, quick response
Complete targeted product development

04

Test Verification

Multi dimensional rigorous testing
Ensure stable and reliable product performance

05

Put into service

Deliver on time and provide
Professional installation guidance and training

Superior Quality from Rigorous Control

Quality Policy

We adhere to international standards, implementing strict quality control from raw material procurement to finished product delivery.

Inspection Process

All products undergo rigorous factory inspections and type tests to ensure performance exceeds international benchmarks.

Professional Team

Our professional QC team and advanced testing equipment form a solid defense for product quality.

IQC • Incoming Quality Control

Strictly select suppliers and inspect incoming materials to eliminate source risks.

IPQC • In-Process QC

Frequent in-line inspections detect deviations early to prevent defect occurrence.

FQC • Final Quality Control

Comprehensive performance & appearance testing ensures delivery qualification.

CI • Continuous Improvement

Feedback mechanisms optimize processes and drive ongoing quality upgrades.

International Certifications, Global Trust

TENRONY

E L E C T R I C A L

Management System Certifications

ISO 9001 (Quality Management System) and ISO 14001 (Environmental Management System) ensure our management processes are scientific and efficient.

Product Safety Certifications

CE (Conformity with EU safety standards) and CCC (China Compulsory Certificate) ensure our products meet market access requirements.

Industry Recognition

The company holds relevant international certifications and type test reports, fully complying with global electrical industry norms and winning wide customer trust.

Global Footprint & Customer Trust

TENRONY
ELECTRICAL

Market Coverage

With exceptional cost-performance and quality standards, our products are sold worldwide, gaining wide recognition and deep trust from clients across regions.

Client Network

We have built long-term partnerships with over **300 clients** across **12+ countries** worldwide, growing together.

Service Commitment

Committed to 100% on-time delivery, we offer localized support and rapid response to exceed clients' dual expectations.

12+

Countries Served

300+

Long-term Partners

“Tenrony's products are reliable, with professional and timely service response. They perfectly meet our high supply chain standards and are trustworthy long-term partners.”

— Procurement Director, European Power Co.

Partner with Tenrony, Create a Shared Future

Scale Advantage

50,000m² modern production base, annual revenue over 500 million, providing solid support for business expansion.

Tech Advantage

20 years of professional accumulation, strong R&D and fast custom response capabilities.

Quality Advantage

International certifications and strict full-process control ensure product reliability.

Service

Global market layout, efficient logistics and considerate after-sales for worry-free service.

◆ Future Outlook

Adhering to "Global Quality, Zhejiang Made", we will increase R&D investment to provide smarter products and services.

◆ Vision of Cooperation

We expect deep cooperation with global partners to promote green, low-carbon and intelligent development together.
